this open access book provides a comprehensive treatment of recent developments in kernel based identification that are of interest to anyone engaged in learning dynamic systems from data the reader is led step by step into understanding of a novel paradigm that leverages the power of machine learning without losing sight of the system theoretical principles of black box identification the authors reformulation of the identification problem in the light of regularization theory not only offers new insight on classical questions but paves the way to new and powerful algorithms for a variety of linear and nonlinear problems regression methods such as regularization networks and support vector machines are the basis of techniques that extend the function estimation problem to the estimation of dynamic models many examples also from real world applications illustrate the comparative advantages of the new nonparametric approach with respect to classic parametric prediction error methods the challenges it addresses lie at the intersection of several disciplines so regularized system identification will be of interest to a variety of researchers and practitioners in the areas of control systems machine learning statistics and data science this is an open access book

both global food and energy systems are increasingly faced with major challenges regarding food security and non fossil energy provision respectively organic or low input agriculture as well as bioenergy production may contribute to securing rising food and energy needs however low input agricultural systems are challenged for their lower productivity compared to high input systems moreover bioenergy systems are often criticized for their unsustainable high input cropping systems consequently innovative approaches are needed to optimize both sectors a promising strategy may be the integration of organic or low input agricultural systems with agricultural

bioenergy production with the objective to increase both productivity and sustainability of land use systems this dissertation examines the opportunities and risks of integrated bioenergy production in organic and low input agricultural systems based on the example of two bioenergy technologies anaerobic digestion and integrated generation of solid fuel and biogas from biomass ifbb by assessment of their structural framework conditions systematic implications as well as economic and risk performance in a final step the role of integrated agricultural bioenergy production within the context of the so called sustainable intensification is debated

here is a complete guide for librarians seeking to launch or refine their systematic review services conducting searches for systematic reviews goes beyond expert searching and requires an understanding of the entire process of the systematic review just as expert searching is not fully mastered by the end of a library degree mastering the systematic review process takes a great deal of time and practice attending workshops and webinars can introduce the topic but application of the knowledge through practice is required running a systematic review service is complicated and requires constant updating and evaluation with new standards more efficient methods and improved reporting guidelines after a brief introduction to systematic reviews the book guides librarians in defining and marketing their services covering topics such as when it is appropriate to ask for co authorship and how to reach out to stakeholders next it addresses developing documentation and conducting the reference interview standards specific to systematic reviews including prisma institute of medicine and cochrane collaboration are discussed search strategy techniques including choosing databases harvesting search terms selecting filters and searching for grey literature are detailed data management and critical appraisal are covered in detail finally the best practices for reporting the findings of systematic reviews are highlighted experts with experience in both systematic reviews and librarianship including the editors of the book contributed to the chapters each step or piece of the review process planning the review identifying the studies evaluating studies collecting and combining data explaining the results and summarizing the review into a report are covered with emphasis on information roles the book is for any librarian interested in conducting reviews or assisting others with reviews it has several applications for training librarians new to systematic reviews for those developing a new systematic review service for those wanting to establish protocols for a current service and as a reference for those conducting reviews or running a service participating in systematic reviews is a new frontier of librarianship in which librarians can truly become research partners with our patrons instead of merely providing access to resources and services
