the proceedings of a conference organised by the european commission joint research centre institute of advanced materials the conference was held in amsterdam the netherlands in october 1998 and covered all aspects of this highly important subject including links between structural integrity requirements and nde performance the development of performance demonstration qualification for nde systems and experiance of their application in practice feature prominently development of improved nde systems new methods of nde and methods for assessing nde performance such as modelling are also included state of the art coverage of modern computational methods for the analysis and design of beams analysis and design of elastic beams presents computer models and applications related to thin walled beams such as those used in mechanical and

aerospace designs where thin lightweight structures with high strength are needed this book will enable readers to compute the cross sectional properties of individual beams with arbitrary cross sectional shapes to apply a general purpose computer analysis of a complete structure to determine the forces and moments in the individual members and to use a unified approach for calculating the normal and shear stresses as well as deflections for those members cross sections in addition this book augments a solid foundation in the basic structural design theory of beams by providing coverage of thin wall structure analysis and optimization techniques applying computer numerical methods to classical design methods developing computational solutions for cross sectional properties and stresses using finite element analyses including access to an associated site with software for the analysis and design of any cross sectional shape analysis and design of elastic beams computational methods is an essential reference for mechanical aerospace and civil engineers and designers working in the automotive ship and aerospace industries in product and process design machine design structural design and design optimization as well as students and researchers in these areas
