designed as the definitive reference on the compilation of the esterel synchronous reactive real time language compiling esterel covers all aspects of the language and includes a tutorial a reference manual its formal semantics and detailed technical information about the many techniques used to compile it esterel is based on the simple idea of providing a software language that has a synchronous model of time that is the execution of the program is divided into discrete instants and statements are either guaranteed to execute in a single instant or take multiple instants as requested by the programmer suitable for programming safety critical real time systems esterel and its model of computation have found use in industrial applications such as avionics integrated circuit design and other safety critical environments while compiling esterel does not assume prior knowledge of the esterel language readers will appreciate having prior knowledge of programming language semantics and compiler technology along with some familiarity with synchronous digital hardware design researchers as well as advanced developers will find compiling esterel essential for understanding esterel at all levels

setting out multiple perspectives from media and journalism scholars this collection addresses the implications that today's technological, socio-political and economic conditions have for relations between journalists, sources, audiences and wider publics. Applying an inclusive concept of conflicted societies that goes beyond those affected by violent conflict to include traditionally stable but increasingly polarised democracies such as the UK and the USA, contributors engage with longstanding questions and new challenges surrounding concepts of responsibility, trust, public service and public interest in journalism. The unique span of studies offers international scope including societies often overlooked in media and journalism studies such as Northern Ireland, Turkey, Cyprus, Pakistan, the Democratic Republic of Congo and the Central African Republic. Chapters also feature contemporary case studies such as the COVID-19 pandemic as a route into understanding the pertinent issue of fake news and the local turn in journalism. *Responsible Journalism in Conflicted Societies* is not only a valuable resource for those studying conflict reporting and international journalism but will also appeal to scholars working at the intersection of media, journalism, communication, peace, conflict and security studies.

The study of distributed algorithms provides the needed background in many real-life applications such as distributed real-time systems, wireless sensor networks, mobile ad-hoc networks and distributed databases. The main goal of *Guide to Distributed Algorithms* is to provide a detailed study of the design and analysis methods of distributed algorithms and to supply the implementations of most of the presented algorithms in Python language, which is the unique feature of the book not found in any other contemporary books on distributed computing topics. Features include comprehensive design methods for distributed algorithms, detailed analysis for the algorithms presented, uses graph templates to demonstrate the working of algorithms, provides working Python code for most of the algorithms presented. This unique textbook/study manual can serve as a comprehensive manual of distributed algorithms for computer science and non-CS majors as well as practitioners of distributed algorithms in research projects.

PJ's Story is not a story about rags to riches; it is a test of true love, faith and strength. The story is about a young African American girl growing up in one of the poorest, segregated parts of Southern Alabama. From the time she was a young girl, PJ had dreams of moving to the big city and becoming a successful business woman. The story chronicles PJ's struggling childhood, homelife to adulthood and to single parenthood. It tells of her journey to what she called the big city life and all the struggles and trials she faced along the way, trying to find love in the men she encountered in her life and to fulfill her dreams of success through all her struggles and trials. PJ had to learn the hard way that her quest to find love and success in people was not God's plan for her life. She had to learn that in order to achieve those things, she had to put God first and follow His commands. She learned that love doesn't come from getting God and people to love you, but it comes from you getting to love God, people and yourself. PJ learned that it doesn't matter if you have a two-parent home or a single-parent home; what matters is that you do your best to raise your children in the fear and admonition of the Lord, teaching them the value and the true meaning of love from God's perspective, no matter what path your children may take. Always love them unconditionally and always pray for protection over their lives. In other words, stand in the gap for your children and all your family members and watch God work.
