in order to effectively address global warming many countries have significantly reduced the
amount of carbon dioxide emissions that are put into the atmosphere from the perspective of
industrial structure this volume examines the emission reduction potentials and abatement costs
in china by making an empirical analysis of the emission reduction the author proposes some
practical strategies the book comprehensively summarizes related theories and research of
contaminant disposal modeling and estimates the shadow price of interprovincial co2 emissions
the emission reduction potential of different regions and the marginal emission reduction cost
based on the parametric model it finally puts forward the strategy to adjust the industrial structure
in china the book hence provides solid evidence for policy makers to help mitigate co2 emissions
through industrial restructuring strategy
