This much-needed comprehensive and modern reference on display technology, illumination sources, and color imaging focuses on visual effects and how reproduced images are best matched to human visual features. As such, it teaches readers how to exploit the knowledge of human color information processing to design usable, ergonomic, and pleasing displays or visual environments. The contents describe design principles and methods to optimize self-luminous visual technologies for the human user, including modern still and motion image displays and indoor light sources. Design principles and methods are derived from the knowledge of the human visual system with a special emphasis on color vision, color cognition, color harmony, color preference, and visually evoked emotions. The expert authors include the most important and latest applications of the design principles and methods, forming a comprehensive view of human color information processing from the receptors through the retina via high-level visual perception right up to the level of cognition, preference, harmony, as well as visually evoked emotions. I'm like a whirling leaf in the wind, said one of Dr. Lena Nilsson-Schonnesson's patients, and another I'm in the claws of HIV. Their voices, and those of other HIV-positive patients, frame the humanistic and scholarly discussion in this important book. Dr. Schonnesson, a Fulbright scholar at the HIV Center for Clinical and Behavioral Studies, Columbia University, in 1995 has unusually extensive clinical experience in counseling HIV-positive gay men. Her work with 38 such patients treated between 1986 and 1995 is discussed in the pages that follow. Dr. Schonnesson's longitudinal approach to clinical data is extremely unusual in the psychotherapy literature generally and in the literature on counseling HIV-positive men in particular. Building upon the experience of such recent scholar-clinicians as Klitzman, Isay, Schaffner, and others, Dr. Schonnesson adds something unique by analyzing her ongoing, detailed notes of the psychotherapeutic process in a systematic, quantitative as well as qualitative manner. The analysis of her data is further informed by her coauthor, Dr. Michael Ross, a therapist and investigator whose contribution to the clinical

and research literature on the psychotherapeutic treatment of gay men has already been substantial
