oct 27 2009 as the aforementioned rfc does not include any reference of encoding spaces as i guess using 20 is the way to go today for example 20 is the percent encoding for the binary

apr 18 2013 a bit of explaining as to what that 2520 is the common space character is encoded as 20 as you noted yourself the character is encoded as 25 the way you get 2520 is when

sometimes the spaces get url encoded to the sign and some other times to 20 what is the difference and why should this happen

metabyter i think it is more technically correct to phrase the question as in a url should i encode the spaces using 20 or in the query part of a url because while the example you show
