the turmoil of 2007-2009 is a crisis of financialised capitalism this collected volume analyses

financialisation by drawing on marxist and heterodox theory of finance it examines domestic and international aspects of financialisation placing the crisis in its appropriate social context

since the 2007 financial crisis discussion on issues related to the size spread and frequency of financial crises has captivated a wide variety of audiences why has the world economy experienced such a marked increase in financial transactions and private and public indebtedness since the 1980s how have middle income developing countries suddenly become a part of this dynamic and most importantly how has the topic of financial crises been featured in households daily discussions in both developed and developing parts of the world domna michailidou addresses the questions above through exploring the inexorable evolution of financialisation into financial crisis through the examination of three middle income countries mexico brazil and south korea concentrating on emerging economies and especially choosing three very different economies that all experienced financial crises in the 1990s this book explores what lessons can be learnt regarding financial fragility volatility and failure in the wake of capital market liberalisation

bringing together well known political economists this volume puts the crisis into perspective by analyzing the domestic and international aspects of financialisation

a must read polemic about why the recovery from the 2007 08 crash mostly benefited the 1 and how democratic socialism can save us from a new crash and climate catastrophe for decades it has been easier to imagine the end of the world than the end of capitalism in the decade leading up to the 2008 financial crisis booming banks rising house prices and cheap consumer goods propped up living standards in the rich world thirty years of rocketing debt and financial wizardry had masked the deep underlying fragility of finance led growth and in 2008 we were forced to pay up the decade since has witnessed all kinds of morbid symptoms as all around the rich world wages and productivity are stagnant inequality is rising and ecological systems are collapsing stolen is a history of finance led growth and a guide as to how we might escape it we ve sat back as financial capitalism has stolen our economies our environment and even the future itself now we have an opportunity to change course what happens next is up to us

financialisation and the financial and economic crises provides comparative empirical case studies of a diverse set of eleven countries in particular the book helps in understanding the current mal performance of euro area economies by explaining the causes of the shifts in

growth regimes during and after the crises it goes well beyond the dominant interpretation of the recent financial and economic crises as being rooted in malfunctioning and poorly regulated financial markets the contributions to this book provide detailed accounts of the long term effects of financialisation and cover the main developments leading up to and during the crisis in eleven selected countries the us the uk spain greece portugal germany sweden italy france estonia and turkey the introductory chapter presents the theoretical framework and synthesizes the main findings of the country studies furthermore the macroeconomic effects of financialisation on the eu as a whole are analyzed in the final chapter offering an illuminating overview and invaluable alternative perspective on the long run developments leading to the recent crises this book is essential reading for researchers students and policymakers and an ideal starting point for further research contributors s bahçe r barradas c a carrasco h c mert g cornilleau j creel d detzer n dodig n erdem t evans j ferreiro g gabbi c gálvez c gomez a gonzález e hein e juuse e karaçimen a h k se s lagoa e leão j lepper Ö orhangazi g Özgür r paes mamede m shabani a stenfors e ticci j toporowski l tserkezis j tyson y varoufakis p vozzella g l yalman

this edited book is a collection of selected papers presented at the international conference of political economy icopec 2016 the deliberate employment of the term political economy in the title international conference of political economy implies the fact that economics is perceived as an integral part of social phenomena in the international conference of political economy icopec accordingly even if economic institutions and relations form the foundations of society in the contemporary world economic development is dependent on social power and dynamics while economic policies per se are shaped by not only technical processes but also diverse interests and choices within this context politics is involved in every encounter between different economic classes social groups and genders being shaped by the visions of a better life as the subject matter of philosophy ethics and religion and at times it finds its best expression in art law on the other hand is the embodiment of all social relations which are in their essence political thus this conference does not reduce society to market relations only despite positioning the economy in the heart of social relations above all it considers the society as a political entity indeed everything constitutes the subject matter of politics the arguments in favour of purifying market relations from the influence of politics and the discourse that they take place on their own right serve to disguise the conflicts of interest and power asymmetries inherent therein this conference regards man as homo politicus as aristoteles put it rather than homo economicus in 2016 icopec

conferences were turned into a conference series with its 7th conference and the main theme of the 7th conference was determined as state economic policy taxation and development ijopec publication has undertaken to publish selected papers presented at this conference in english and turkish in five different edited books in the 90s the phenomena of globalization managed to dominate political popular and academic debates while reading a newspaper or a book watching television surfing the internet or participating in a demonstration we come across the links of globalization in our everyday lives globalization as a wide term is variously blamed or credited with a huge range of negative effects e g it is often related to social problems ranging from famine to floods from pollution to poverty and from rural depopulation to urban overcrowding on the contrary globalization can be also considered as the source of success in development for instance decrease in the poverty levels economic prosperity and growth better services and enhanced awareness of human rights nevertheless some sceptics of the benefits from globalization have also described the potential ways in transforming political economic and social relations within and between countries this transformation may lead to the benefit of human welfare worldwide t small iriner bryan christiansen julia dobreva introduction political economy of globalization financialization crises 10 since the 80s we can observe a significant increase in the role of the financial sector this progress is often referred to as financialization financialization has many features and affects numerous different economic entities epstein 2015 stockhammer 2013 one key component is the magnificent growth of the financial sector greenwood scharfstein 2013 point out a massive rise of the financial service sector in the usa during the last 30 years the growth can be proved either by the financial sector s share in gdp the quantity of financial assets or by employment and average wages in the financial sector but this growth is not related to the usa although to a softer scope similar processes can also be observed in other oecd countries philippon reshel 2013 the financial rise has its base in the deregulation and liberalization of the financial and economic system from this point of view financialization is the cause rather than the effect this is the major difference compared to the other approaches financialization can affect the macro economy through four main channels these are income distribution investment in capital stock household debt and net exports and current account balances as a correction it is discussed that economic structures governed by financialization should be addressed on four dimensions a re regulation and reduction of the financial sector b redistribution of income from top to bottom and from capital to labour c re orientation of macroeconomic policies to stabilize domestic demand at non inflationary full employment levels and eventually d re creation of

international monetary and economic policy coordination

extraordinary growth of the financial relative to the nonfinancial sector has marked the development of mature capitalism during the last four decades the changing balance between the two sectors has altered the outlook of the economy and facilitated the spread of financial concerns practices and outlooks across society the result has been the gradual transformation of contemporary capitalism namely its financialization since the late 1970s there are similarities between the marxian the post keynesian and other heterodox approaches to analyzing the profound changes in money and finance in the global economy since the 1980s prominent among them is a common focus on financialization but also on the limits of monetary policy the transformation of banking the tendency to crisis related to financial excess and the problematic role of neoliberalism in finance furthermore the complexity of the interrelationship between finance and the rest of the economy has increased since the great crisis of 2007 9 this book tackles several of these developments as well as engaging in debate among different currents of heterodox economics the chapters in this book were originally published in the *japanese political economy*

since the 2007 financial crisis discussion on issues related to the size spread and frequency of financial crises has captivated a wide variety of audiences why has the world economy experienced such a marked increase in financial transactions and private and public indebtedness since the 1980s how have middle income developing countries suddenly become a part of this dynamic and most importantly how has the topic of financial crises been featured in households daily discussions in both developed and developing parts of the world *domna michailidou* addresses the questions above through exploring the inexorable evolution of financialisation into financial crisis through the examination of three middle income countries *mexico brazil and south korea* concentrating on emerging economies and especially choosing three very different economies that all experienced financial crises in the 1990s this book explores what lessons can be learnt regarding financial fragility volatility and failure in the wake of capital market liberalisation

this book explores the causes of the current economic crisis evaluates the foundational principles of capitalism that contribute to crises and investigates how an islamic economic and banking system could play a role in fostering global stability it includes theoretical and empirical analysis and assesses the resilience of the islamic economic system and islamic financial institutions in the face of economic and financial crises with a particular focus on

organisation of islamic cooperation oic member countries furthermore the effects of these crises on income and wealth distribution are discussed the book compares islamic and conventional economics in response to economic crises both across countries and financial institutions and provides a brief analysis of financial crises from a theoretical point of view examining various approaches it addresses the issue of the relevance of all these theories in relation to the present crisis and draws useful policy implications thereafter it discusses how the islamic financial system could serve to mitigate the occurrence of a financial crisis since the prohibition of riba maysir and gharar transactions offers a solution to financial crisis from speculative bubbles and crash it also discusses some of the challenges facing the islamic finance industry this is a useful guide for researchers and advanced students of islamic economics and finance

there can be no doubt that the influence of the financial sphere has intensified rapidly in recent years but there is much debate about the effect of that influence the aftermath of the financial crisis has led to numerous discussions of the phenomenon of so called financialization the increasing impact of financial institutions on the activity of all business entities emerging threats related with dynamically developing financial markets and the growing importance of financial themes in light of these issues which appear in all economies and touch all entities and every area of economic activity there is a need for a summary and evaluation of the role of financialization in the world today this monograph presents the role of financialization in the modern world it shows positive as well as negative effects of financialization on the stability of the whole economy the functioning of different types of markets activity of enterprises state institutions and behaviours of households written by expert contributors this book plays an important role in the debate concerning future directions of development of the financial sector and financial markets financialization and the economy is of great importance to those who study political economy macroeconomics and banking

the debt crisis in greece has sparked lively debates about the origins of the crisis and policy measures to be adopted in order to fix it the authors offer the first original and comprehensive narrative on greece

this book examines how decisions made by the conservative government during the covid19 pandemic have increased economic inequality in the uk decades of austerity asset based welfare and financialization had already exacerbated social divisions in the uk prior to the pandemic the political blueprint behind these measures combined privatized keynesianism and the asset economy to explain economists have highlighted that inequality derives from the fact that income from wealth increases at a faster rate than income from wages the ensuing political assumption is that in the face of pressures on public finances promoting asset ownership is the best alternative to government funded welfare schemes what this meant as the pandemic unfolded was that when tough decisions about resource allocation needed to be made the uk treasury and the bank of england found almost unlimited funds to rescue and protect asset holders and middle income homeowners whilst reverting to a narrative of misfortune for the asset less poor this book assesses the political decisions taken by uk policymakers during 2020 21 and their consequences in doing so it challenges policymakers and the informed public to re consider the morality of inequality and to make alternative decisions to promote a more ecologically sustainable caring equal and prosperous society

essays that address the question how can people and class agency change this destructive course of history capitalism s addiction to fossil fuels is heating our planet at a pace and scale never before experienced extreme weather patterns rising sea levels and accelerating feedback loops are a commonplace feature of our lives the number of environmental refugees is increasing and several island states and low lying countries are becoming vulnerable corporate induced climate change has set us on an ecocidal path of species extinction governments and their international platforms such as the paris climate agreement deliver too little too late most states including south africa continue on their carbon intensive energy paths with devastating results political leaders across the world are failing to provide

systemic solutions to the climate crisis this is the context in which we must ask ourselves how can people and class agency change this destructive course of history volume three in the democratic marxism series the climate crisis investigates eco socialist alternatives that are emerging it presents the thinking of leading climate justice activists campaigners and social movements advancing systemic alternatives and developing bottom up just transitions to sustain life through a combination of theoretical and empirical work the authors collectively examine the challenges and opportunities inherent in the current moment this volume builds on the class struggle focus of volume 2 by placing ecological issues at the centre of democratic marxism most importantly it explores ways to renew historical socialism with democratic eco socialist alternatives to meet current challenges in south africa and the world

the book discusses various cases of financialisation and financial crisis in south eastern europe it represents not only the ex post analysis of how financial instability was created in a period of economic growth and how it could have been prevented but also provides insights for policy makers today

this book assesses the impact of post 9 11 domestic counterterrorism policy on us political life it examines political discourse law institutional architecture and state population relations and shows that homeland security is a project with wide ranging implications for democratic institutions and culture these implications are addressed through a novel approach that treats law and the state as social relations and relates developments in law to those in the state and in social dynamics on this basis the book examines the new political representations in counterterrorism discourse especially regarding the relation between the state and the population it examines the form and content of counterterrorism law the powers it provides and the structure and functions it prescribes for the state by focusing on the new department of homeland security and the restructuring of the intelligence apparatus the book assesses the new intelligence led policing model finally it examines forms of popular support and resistance to homeland security to discuss citizenship and state population relations the author concludes that homeland security has turned the us into a hybrid polity the legal and political institutions of democracy remain intact but their content and practices become authoritarian and exclude the population from politics these legal and political forms remain operative beyond counterterrorism in the context of the present economic crisis they are a permanent configuration of power this book is an indispensable

companion for students of counter terrorism and security studies politics human rights constitutional and criminal law american studies and criminology
