tradition including bergson foucault freud heidegger husserl and merleau ponty to
develop the broad sweep of the aims of continental philosophy lawlor discusses
major theoretical trends in the work of these philosophers immanence difference
multiplicity and the overcoming of metaphysics his conception of continental
philosophy as a unified project enables lawlor to think beyond its european origins
and envision a global sphere of philosophical inquiry that will revitalize the field

through a curated selection of papers written over four decades by one of
australia s leading philosophers this collection demonstrates the impact of
continental philosophy on philosophical thought in australia the development of
specific philosophical problems over a period of more than forty years by a
philosopher whose first training was pre continental shows that it is possible to
achieve interaction between continental and pre continental methods in philosophy
even while recognizing their distinctiveness these essays work towards continental

volume serves as an essential reference work for philosophers and those engaged
in the many disciplines that are integrally related to continental and european

the idea of continental philosophy has never been properly explained in philosophical terms in this short and engaging book simon glendinning attempts finally to succeed where others have failed although not by giving an account of its internal unity but by showing instead why no such account can be given providing a clear picture of the current state of the contemporary philosophical culture glendinning traces the origins and development of the idea of a distinctive continental tradition critiquing current attempts to survey the field of contemporary philosophy

foucault s critical philosophy of history unfolding the present provides a comprehensive interpretation of foucault s work by focusing on its methodological procedural and epistemological elements adam takács argues that despite all its thematic and analytical diversity foucault s procedure can be understood within a unified framework based on the historical problematization of the present this procedure triggered by current social issues and aiming at a diagnostic screening of the present through a constructive exploration of the past thus sets in motion not only a specific philosophical vision of history and a research practice often related to the procedures of historiography but also new ways of critical analysis of social phenomena this book subjects all these elements to a systematic analysis demonstrating that within this framework foucault s often debated views on historical realism and constructivism his methodological choices and ontological commitments take on a coherent profile culminating in a timely social critical project of liberation of knowledge and political subjectivation
