is there evidence for the existence of god defined as the transcendent entity responsible for all material existence the author believes that there is albeit such evidence is not necessarily proof for everyone in this two part study wayne talbot firstly presents the evidence that has convinced him that god is the most plausible explanation with a limited but sufficient understanding of the nature of existence in terms of energy matter space and time he demonstrates his primary axiom that nothing can explain itself the natural corollary of this is that scientists will never be able to explain the origins of material existence by examining the material itself an explanation of origins must always lie outside the entity being examined this is why scientists cannot explain the origin of the proposed singularity and why some scientists seek an alternative to the big bang model of our universe even resorting to logical absurdities such as the universe creating itself out of nothing while in the presence of something with the reality of god being his presupposition for what follows the author examines the case for monotheistic religions versus polytheistic concluding that the latter are antithetical to a god who is one left with a choice between judaism christianity and islam he concludes that if god has communicated his guidance for living to any it is most likely judaism as recorded in the

hebrew scriptures the question becomes which parts of those scriptures were intended for the children of israel alone and which were for all people for all time researching ever deeper he reveals what he has come to believe about how god wants us to relate to him and the specific guidance that should be reworded for contemporary times the spirit of torah is so much more than the mere words
