this book describes practices used on farms and in farmers markets selling foods directly to consumers in u s and international markets it identifies hazards associated with those practices that could put consumers at increased risk for foodborne illness it also provides tools for identifying hazards on farms and in markets and guidance for establishing food safe markets the local food movement inspired by initiatives such as the usda s know your farmer know your food farm to school farm to pre school and the people s garden is sweeping the country nowhere is this interest more evident than at farmers markets the number of farmers markets has increased almost 400 since the early 1990s with over 8 600 farmers markets listed in the usda s market directory in 2016 many of the customers for local markets are senior adults people who may have health concerns and mothers with young children shopping for foods they perceive to be healthier and safer than those available in grocery stores this means that many of the customers may be in population groups that are most at risk for foodborne illness and the serious complications that can result in surveys however farmers selling directly to consumers self reported practices that could increase risk for foodborne illnesses these included use of raw manure as fertilizer without appropriate waiting periods between

application and harvest as outlined in the national organic program a lack of sanitation training for farm workers handling produce a lack of proper cleaning and sanitizing of surfaces that come in contact with produce and use of untested surface water for rinsing produce before taking it to market surveys of market managers found that many had limited experience and most had no food safety plans for their markets observational studies in markets have corroborated self reported practices that could increase foodborne illness risks including lack of handwashing lack of access to well maintained toilet and handwashing facilities use of materials that cannot be cleaned and sanitized appropriately and lack of temperature control for foods that must have time and temperature controlled for safety these potential food safety risks are not only seen in u s farmers markets but also have been identified in international markets this book is unique in that it provides evidence based information about food safety hazards and potential risks associated with farmers markets it presents an overview of farm and market practices and offers guidance for enhancing food safety on farms and in markets for educators farmers producers vendors and market managers dr judy a harrison is a professor in the department of foods and nutrition at the university of georgia uga where she has been named a walter bernard hill fellow for distinguished achievement in public service and outreach serving as a food safety specialist for uga cooperative extension she has provided 25 years of food safety education for a variety of audiences across the food system

this is the first book to focus on designing a financial market that works well and that includes making and or modulating detailed regulations and or rules by a computer simulation of an agent based artificial financial market model abafmm the design of a financial market is very important for the development and maintenance of an advanced economy but designing it is not easy because changes in detailed rules even those that seem trivial sometimes have unexpectedly large impacts and side effects in a financial market which is a complex system traditional economics cannot treat a financial market as a complex system in which micro macro interaction and feedback loops have played essential roles because traditional economics can only treat macrophenomena and micro processes separately abafmm can do it however this book explains first why abafmms are needed to design financial markets and which models have good features following that explanation the book discusses how to build the models then cases of recent studies and their contributions are shown and finally the difficulties of researchers in this field are considered this book is expected to facilitate the design of more abafmms to contribute to creating financial markets that will further develop and maintain advanced economies

we welcome you to the proceedings of the 5t international conference on e commerceandwebtechnology ec web2004 heldinconjuctionwithdexa 2004 in zaragoza spain this conference rst held in greenwich united ki dom in 2000 now is in its fth year and very well established as in the four previous years it served as a forum to bring together researchersfrom academia and commercial developers from industry to discuss the current state of the art in e commerce and technology inspirations and new ideas emerged from intensive discussions during formal sessions and social events keynote addresses research presentations and discussions during the c ference helped to further develop the exchange of ideas among the researchers developers and practitioners present the conference attracted 103 paper submissions and almost every paper was reviewed by three program committee members the program committee lected 37 papers for presentationand publication a task which was not easy due to the high quality of the submitted papers we would like to express our thanks to our colleagues who helped with putting together the technical program the program committee
