this collection brings together several essays which have been written between the years 1975 and 1983 during that period i have been occupied with the attempt to find a satisfactory explicate for the notion of truthlikeness or verisimilitude the technical results of this search have partly appeared elsewhere and i am also working on a systematic presentation of them in a companion volume to this book truthlikeness forthcoming hopefully in 1985 the essays collected in this book are less formal and more philosophical they all explore various aspects of the idea that

progress in science is associated with an increase in the truthlikeness of its results even though they do not exhaust the problem area of scientific change together they constitute a step in the direction which i find most promising in the defence of critical scientific realism chapter 1 appeared originally in finnish as the opening article of a new journal tiede 2000 no 1 i 1980 a finnish counterpart to journals such as science and scientific american this explains its programmatic character it tries to give a compact answer to the question what is science and serves therefore as an introduction to the problem area of the later chapters chapter 2 is a revised translation of my inaugural lecture for the chair of theoretical philosophy in the university of helsinki on april 8 1981 it appeared in finnish inparnasso 31 1981 pp

has dramatic implications for social science and the humanities for philosophy and for education written in an informal accessible form with the exception of the appendix which is more technical

in spite of the amazing technological marvels of the modern world that have stemmed from science there is no agreed upon definition of what science is in this lively colorful and engaging work don degracia contends that science is a very weak form of what has been described for thousands of years in hindu india as samadhi samadhi is an advanced technique of raja yoga in which the meditating subject fuses with the object of meditation in a process that has been called knowing by being by understanding science as a weak form of samadhi and comparing it to the knowledge acquired from yogic practices many of the limitations of science are brought to the fore these include the link between mind and body the role of the senses as middle men between the mind and the objects of perception why mathematics is unreasonably effective for describing the physical world and how and why power is unlocked by the human mind when correct knowledge is obtained
